

FreeThinkers Team Status Report 4

Goals From Last Week:

- Make sure the previous week's tasks are completed and of good quality
- Come up with a list of test cases
- Complete scenarios for all user stories
- Work on setting up the basic functionality of the app
- Start thinking about the presentation
- Make sure all work is still of good quality

Progress Made:

What we've done:

- We created the basic outline of the application
- Added testing scenarios for 4 features
- Updated the backlog
- Had a discussion about improving the application

What worked:

- Using flask to create the basic application
- Working during class

What we struggled with:

- N/A

Plans and Goals:

- Continue working on the basic outline of the application to make it look like what we visualize in the UI Framework mock-up
- Complete and make sure all basic features work for the MVP
- Update github to include all the files

Agenda for Meeting with TA:

- Ask any questions that might come up when working on the milestones
