

FreeThinkers Team Status Report 2

Goals From Last Week:

- Build a skeleton framework for the web application
- Make a Wireframe (front-end design) for the web application
- Create tests for features
- Add the features for the MVP
- Keep up with deadlines and quality of work
- Meet in class Tuesday and Thursday and if required Thursday after class as well

Progress Made:

What we've done:

- Came up with ethical considerations relating to our web application
- Worked on how our web application can be misused and how to prevent misuse
- Created a wireframe of the front-end design of our web app
- Updated the Trello board

What worked:

- Using google slides to create our wireframe
- Using the group chat for communication
- Using the time given in class to work on our project

What we struggled with:

- Coming up with ethical considerations

Plans and Goals:

- Build a complete concept diagram
- Build a complete DFD of the application
- Create tests for features
- Add the features for the MVP
- Keep up with deadlines and quality of work

Agenda for Meeting with TA:

- Schedule a meeting if we have questions
