

FreeThinkers Team Status Report 3

Goals From Last Week:

- Build a complete concept diagram
- Build a complete DFD of the application

Progress Made:

What we've done:

- Created a DFD diagram through draw.io
- Created a level 1 diagram
- Worked on models and associations(created a list as well as an er diagram)
- Updated the Lo-Fi prototype to include routes and views

What worked:

- Using draw.io to created our dr diagram as well as er diagram
- Using google slides to create our lof-fi prototype
- Working on our milestone during class

What we struggled with:

- Understanding what was being asked for the models and associations part

Plans and Goals:

- Make sure the previous week's tasks are completed and of good quality
- Come up with a list of test cases
- Complete scenarios for all user stories
- Work on setting up the basic functionality of the app
- Start thinking about the presentation
- Make sure all work is still of good quality

Agenda for Meeting with TA:

- Ask any questions that might come up when working on the milestones
