

FreeThinkers Team Status Report 6

Goals From Last Week:

- Adding registration and log in feature
- Adding reply to a post feature
- Continue having/ presenting good quality work
- Updating the CSS

Progress Made:

What we've done:

- Implemented the login/sign up feature
- Implemented the profile feature where each user can view posts made by them as well as user information
- Implemented the All posts where you can view all the posts created by all users
- Implemented the reply feature allowing you to reply to a post
- Implemented the report feature where each user can report a post

What worked:

- Working on implementing features before class and during class
- Using sqlite database to differentiate between my posts and all posts and specify user name, etc.
- Asking the TAs for guidance on the implementation of features
- Using the flask practice app for reference

What we struggled with:

- Coming up with ideas on how to implement certain features

Plans and Goals:

- Start preparing for the final presentation
 - Create google slides
 - Make sure all features are implemented
 - CSS is consistent
- Push everything to github
- Go over ethical considerations of the application

Agenda for Meeting with TA:

- Ask any questions that might come up when working on the milestones
